

Royal College of Physicians of Edinburgh

EXAMINATION FOR MEMBERSHIP

OCTOBER 1912

DISEASES OF THE SKIN

1. Discuss Dermatitis Herpetiformis.
2. Describe the clinical appearance, course, histology, and treatment of Rodent Ulcer.
3. If four cases of Ringworm were discovered among the boys in a boarding-school of a hundred pupils, what directions would you give those responsible for the management?
4. How would you prepare a Vaccine for a case of Sycosis? Explain its action.
