### MIDWIFERY

1. Explain how deflexion attitudes may interfere with the course of labour in head presentations and describe the management of such conditions.

2. Under what circumstances may excessive abdominal enlargement be met with in pregnancy? Discuss the possible conditions and their differential diagnosis.

3. Describe the clinical varieties of abortion and give their differential diagnosis.

4. What are the risks and what are the possible terminations of transverse presentations? Give the diagnosis and treatment of a shoulder case.
