

Royal College of Physicians of Edinburgh

EXAMINATION FOR MEMBERSHIP

JULY 1914

DISEASES OF THE RESPIRATORY SYSTEM

1. What are the causes of Pneumothorax? Give its symptoms, physical signs, and prognosis.
2. Discuss the bacteriology of Empyema in children. How would you differentiate a case of Empyema from one of Chronic Caseous Pneumonia?
3. Give the morbid anatomy, etiology, symptoms, and treatment of Gangrene of the Lung.
4. Mention the varieties of Bronchiectasis, and give its causes, physical signs, and treatment.
