*OCTOBER 1921*

---

### DISEASES OF THE RESPIRATORY SYSTEM

1. What are the causes of asthma? Discuss the principles of treatment which you would adopt.
2. How does syphilis affect the lungs? Give the clinical features which suggest the diagnosis.
3. Discuss the value of radiography in chest examination, stating the diseases which may be diagnosed by its use.
4. How does oedema of the lungs occur? Discuss the clinical features to which it gives rise. What treatment would you adopt?
