

Royal College of Physicians of Edinburgh

EXAMINATION FOR MEMBERSHIP

APRIL 1915

TROPICAL MEDICINE

1. Enumerate the Tropical Skin Diseases of (*a*) animal, and (*b*) unknown or imperfectly known origin. What are the diagnostic symptoms of the latter?
2. State fully the treatment of Malarial Fever, Sprue, Dengue, and Bilharzia.
3. Describe the diagnosis, etiology, and treatment of Yellow Fever.
4. What are the chief Infectious Diseases (excluding those of venereal origin) liable to occur among troops in the tropics? What are the conditions, including "carriers," of their spread? Discuss briefly the measures for their prevention.
