### TROPICAL MEDICINE

1. Discuss the etiology, mode of transmission, diagnosis, and treatment of kalaazar.
2. How would you proceed to examine a stool for parasites other than bacteria? Describe briefly what you might find in the stool of a patient resident in the tropics.
3. Discuss the etiology, symptoms, and treatment of sprue.
4. Discuss the main epidemiological characteristics of (1) malaria; (2) plague; (3) undulant fever. Suggest in each case possible methods of control, and give your reasons for employing them.
