

Royal College of Physicians of Edinburgh.

EXAMINATION FOR MEMBERSHIP.

11TH JANUARY 1898.

SYPHILIS AND VENEREAL DISEASES.

1. Give the distinguishing characters of the Hard Chancre, the Soft Sore, and the Phagedænic Ulcer, and specify the treatment suitable for each.

2. State the differences which exist between the Eruptions of the Secondary, and those of the Tertiary period in Syphilis.

3. What is Colles' Law? How do you explain the occurrence of late Tertiary Lesions in women who have borne children, yet have shown no primary or secondary symptoms?

4. What is Gleet? How would you treat an obstinate case?
